Modernize Allen-Bradley® DF1 Communications to EtherNet/IP™

Need a backup plan now that Rockwell Automation® has discontinued the 1761-NET-ENI?

ProSoft’s Routing Module can be used in similar ways – including enabling your modernization to a PanelView™ Plus. The Routing Module supports:

- **PLC-to-PLC Messaging**
  - DF1 to EtherNet/IP™
  - MicroLogix™ to CompactLogix™

- **SCADA/HMI to PLC via existing leased line modems**
  - DF1 to EtherNet/IP™
  - SCADA/Control Room to Leased Line Modems

- **Remote Programming**
  - DF1 to EtherNet/IP™
  - MicroLogix™ to ControlLogix™

- **Modernization to PanelView Plus**
  - DF1 to EtherNet/IP™
  - SLC™ to PanelView™ Plus

Have a large DF1-based application?

In industries such as water and wastewater, existing leased line modem infrastructures can be used with the DF1 Messaging Module to enable a lower-risk phased modernization.
