To Whom It May Concern:

Re: California Proposition 65 Compliance – All ProSoft Technology Products

California's Safe Drinking Water and Toxic Enforcement Act of 1986, better known as Proposition 65, requires that businesses provide warnings to Californians about potential exposure to chemicals or substances that may cause cancer, birth defects, or other reproductive harm. These chemicals can be in the products that Californians purchase, for their homes or workplaces, or that are released into the environment. Proposition 65 law applies to any company that operates, manufactures or sells products in California.

Consistent with our core values, ProSoft Technology strives to provide high quality, safe products to our customers. When used as intended, our products should not present an exposure risk of ingestion, inhalation or by absorption through the skin to any of Prop 65's current list of chemicals. Nonetheless, out of an abundance of caution, and in the event our products are misused or used in ways we do not foresee, we are taking the precaution of placing a Prop 65 warning on the label inserts of all our products and at the entrance to our facilities in California where our products are present. This warning does not imply the product is unsafe, but rather is provided to allow the consumer to make informed decisions regarding their purchase and their exposures to these chemicals.

Product Labels:

 WARNING: Cancer and Reproductive Harm www.P65Warnings.ca.gov

Entrance Signage:

 WARNING: Entering this area can expose you to lead from wire insulation. Lead is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov
