Explanation regarding REACH

Dear Customer,

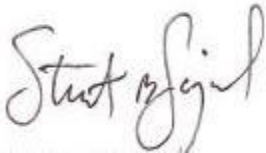

You are purchasing exclusively electrical or electromechanical, non-chemical products from us. With these products we are, in terms of REACH (1907/2006/EC), a so-called “downstream” user. We are therefore neither subject to mandatory registration, nor obligated to compile safety data sheets. Products purchased by you ought, under normal intended use, not release substances.

Our products do not contain residual hazardous substances originating from our production process.

We have asked our suppliers to confirm the legal regulations especially concerning hazardous substances remaining in our products (e.g. REACH Annex XVII). As we didn't receive negative answers we assume that our suppliers are compliant with legal regulations.

In consideration of the actual candidate list (<https://echa.europa.eu/candidate-list-table>) and the information from our suppliers we can exclude the existing of SVHC (Substances of Very High Concern) in a concentration above 0.1% weight by weight in our articles. If this should be the case in the future, we will naturally provide information, in accordance with our obligations according to §33 of the REACH regulations, about the existence of the substances concerned

Best Regards,

Stuart Siegel
